Made by us

and you

Since 1941, Figgjo has been bringing high-quality tableware, proud Norwegian traditions, and a multitude of porcelain to restaurants, hotels, public spaces, and corporate facilities all over the world.

We firmly believe in the power of creativity and how tableware can elevate the dining experience, bringing joy, laughter, and a sense of unity to gatherings around the table. All the stuff that people can never have too much of.

Let's create inspiring table settings, together.

Excellence in Norwegian porcelain

Figgjo porcelain is modern handicraft on an industrial scale. We make products for the professional market. Products that cater to the senses, that last, that inspire.

Jan Erik Hauge is a chef, Figgjo-friend, and a former member of the National Culinary Team.

Made in Norway

Figgjo is deeply rooted in the Scandinavian design tradition, where timelessness and versatility shape everything we create. For generations, our skilled artisans have dedicated themselves to perfecting the craft of porcelain production at our factory. Using only the finest natural materials, we ensure a process that is in harmony with the environment. Crafted to last and made with purpose, our products stand the test of time, remaining in use year after year.

Chef approved

For decades, we've partnered with award-winning chefs to create products that meet the demands of the most ambitious dishes. Every detail is purposefully designed for functionality, ensuring each product supports chefs in their work. Through our partnership with the Nordic Chefs Association, we continue to push boundaries, driven by a shared passion for culinary innovation and excellence.

Quality over quantity

Our vitro porcelain withstands the toughest demands of professional kitchens. Made from the same alumina-vitrified clay body, each piece features exceptional strength and durability. With every step, from design to production, handled in-house, we ensure consistency and lasting reliability across our entire range.

Tailored for you

Our flexible system allows you to combine shapes, decorations, and colors to bring your vision to life. From handmade techniques to custom prints, we create decors of the highest in-glaze quality, emphasizing attention to detail and finish. Our designers are here to help refine your ideas, ensuring everything comes together seamlessly. With a minimum order of just 48 pieces, creating something truly unique is easier than ever.

Serving the environment

With one thousand solar panels installed, we generate clean energy that powers our daily office operations.

Futureproof

For us, sustainability is never an after-thought; it is ingrained in everything we do. And Figgjo products have been sustainable for a long time. Our products last, and they all serve a specific purpose.

Zero waste

Products that don't meet our quality standards – roughly 4 % – are used as filling for a local construction company. That means 4 % waste is turned into zero waste. We repair as much as 10 % of our products during production. This alone saves us 100 tonnes of CO₂ emissions.

Abundant access to clean energy puts Norway in a unique position compared to other countries. As the largest hydropower nation in Europe, 60 % of the energy we use comes from clean, renewable energy.

Pioneering EPD

We are calculating the total environmental impact of our products throughout its entire life cycle. From extracting and transportation of raw materials, manufacturing, usage, maintenance, to disposal; "from cradle to grave". We do this with full transparency measuring our products environmental performance using verified and comparable data. We are the first porcelain table top company to do this. Why? Because we believe our products are better.

Certified management system

Figgjo is dedicated to quality and environmental management, consistently maintaining certified ISO systems. ISO9001 and 14001 is the international standard for managing the company's quality and environmental aspects.

It also ensures compliance with environmental laws and helps build trust with customers who values green initiatives. Figgjo are one of few who also holds the ISO50001 certification for maintaining an energy management system.

Items that don't meet quality standards are reused as filling materials. Our parking lot is in fact paved with recycled porcelain.

Colours don't clash

They are also the spice of life. At Figgjo, we spend a lot of time developing new colours in our dedicated color lab. We have sixty unique shades of color to choose from.

These colors are our hand decorating colors only. For logo/graphic decals, additional colors are available. Please note that the colors shown here may vary slightly from the actual color. For updated color palette, visit figgjo.com/colors

*Colors suitable for the Flom decor technique.

Thank you

Our world is growing, and we're meeting so many great people along the way. Although Figgjo makes porcelain, it is all about the people we make the porcelain for.
